electric mode

Float offers optimal comfort thanks to his innovative and patented relax-system. Four noiseless and built-in electric motors ensure a sofa that effortlessly adapts to your needs. Do you want to watch that indispensable soccer match, read an exciting book, or just close your eyes for a second? Thanks to integrated buttons you can personalize your position on the sofa. You can choose to move up the back cushion, or to fold out the additional footrest, which happens automatically. Would you like to relax even more? Float also offers the option of extending the seating cushion and bending the neck support slightly. This puts you in a comfortable reclined position, which makes your optimal relaxation position complete. When you bring Float into your home, you choose luxury. Power for the electric motors is provided through a cord or wireless rechargeable batteries.

durable seating comfort: a force from within

It's like they say. It's the inside that matters. Although Float is destined to be an eye-catcher that brings instant character to your living space - or any space - the true relaxing experience comes from within. If you would cut the upholstery you'd firsthand experience the extreme quality of our selected high density cold

foam, famous Dacron cotton wool and Nosag springs. Yes, we went over the top to implement the world's finest materials in your Float. Cause although invisible to the eye, these insides provide endless ultimate seating experiences. This is what we stand for. This is the only way to wear the Float name with pride.
